Compose Beam

Spine-Based Workspaces

Compose® Beam creates an environment where people can—and want to—do their best work. Its freestanding construction uses a beam structure and uniquely designed, independent legs to create a lighter-scale, contemporary aesthetic people are drawn to. An efficient way to optimize open plans, Compose Beam provides workspaces, essential tools, power, and connectivity to individuals, while encouraging team collaboration and communication.

Features

- Light-scale, spine-based system within the Compose family, designed for configuration flexibility and easy adaptability as needs change
- Any freestanding fixed-height, height-adjustable, and mobile tables can be positioned along the beam as needed with easy access to power and data connectivity
- Uses an 8" (203.2 mm) beam with freestanding T-leg and A-leg options for a contemporary, non-panel solution with a more open feel
- Minimalistic screens provide a clean look and delineation of personal space while promoting interaction
- Compatible with a variety of accessories, storage, and tools, including Belong® work tools, Belong Plus screens, Active Components™, and X Series® storage
- Accommodates 90° applications
- Uses many of the same components and visually harmonizes with Compose and Compose Connections workspace applications
- Gallery panels enhance space division, add privacy/enclosure, and offer an elevated aesthetic

Certifications

- BIFMA LEVEL® 3 Certified
- GREENGUARD Gold Certified
- FSC® Certified
