

Architectural Walls

Enclose | Enclose Frameless Glass | Trivati

One company. Three architectural wall systems.

And unlimited possibilities. At Haworth, our portfolio of wall solutions expand what you can do inside a building's architecture. Enclose®, Enclose Frameless Glass (EFG), and Trivati™ provide three beautiful, practical ways to define your space. Our walls easily adapt and respond to evolving environments. Our finishing options deliver harmonious, integrated aesthetics. And our experienced team understands and supports your needs. No matter what your reasons for choosing architectural walls, we have a product tailored just for you.

ENCLOSE

Enclose. An architectural wall system with all the fluidity of furniture and all the presence of permanent walls. A clean, simple design provides a timeless look, while a 10-year warranty ensures the performance will last just as long. Sustainably designed to anticipate change, its moveable panels offer endless adaptation. It all adds up to a performance that's so versatile it surpasses conventional construction.

Ready. Set. Change. Enclose walls let you pull any space together in minutes flat. The unitized, factory-built panels arrive pre-assembled and ready to tilt into place—no assembly, complex scheduling of trade workers, lengthy downtime, or hidden costs required. Once the walls are in place, any panel or door can be removed and replaced without disrupting the entire system, making them nimble enough to adapt to whatever the future may bring. Even power and data are reconfigurable, so you can update your walls as often as you update technology. Thanks to the reusable nature of Enclose, it minimizes what ends up in the landfill, too.

Can-Do Construction. Enclose empowers walls to do much more than simply divide space. Hang shelves, accessories, or furniture—even from other manufacturers. Incorporate writing or magnetic surfaces into any part of the wall. Integrate quick-connect technology into each panel. Reinforce your brand throughout your environment. Improve acoustical privacy with an impressive sound transmission class (STC) rating of up to 45. And enjoy complete creative freedom to combine multiple materials—all for much less than you'd spend to achieve the same effects with conventional drywall.

Effortless Connections. The standard four-inch frame of Enclose meshes perfectly with base building architecture, enhancing connections to create a refined atmosphere. A range of heights and widths lets you tailor beautifully precise solutions for any ceiling height or building dimension. It's also offered with a kit of parts to meet all building conditions including bulkheads and HVAC systems, so you can create a seamless finish from floor to ceiling and column to column.

Value Added. From the first installation to every move you make, this proven system protects your bottom line. With built-in efficiencies like non-progressive tiling and quick-connect electrical wiring, Enclose is the fastest, easiest, and most adaptable wall system in the market. Unlike labor costs that vary from region to region, the product cost is consistent for everyone. When you add up all the costs of conventional construction, Enclose is equivalently priced—and with any upgrades, it beats conventional walls. And because reconfiguring Enclose is quick and easy, with every change you make, the savings keep adding up.

Thoughtful Integration. Enclose walls look like they were made to go with everything else we make—because they were. As part of Haworth's Integrated Palette™ portfolio, Enclose can be combined with a wide range of desking, systems, tables, and

other architectural products. Consistent dimensions, connections, and finishes future-proof your interiors, ensuring that the Haworth products you choose today will tie-in functionally and aesthetically with the ones you add tomorrow.

ENCLOSE FRAMELESS GLASS

Enclose Frameless Glass. A sophisticated solution with effortless combinations, flexible applications, and gorgeous floor-to-ceiling walls. Made of frameless glass, these award-winning demountable walls provide a storefront option that can integrate perfectly with the rest of the Enclose system or stand on its own. A 10-year warranty promises years of solid performance, and highly recyclable materials make them a responsible choice.

Simply Beautiful. The simple, sophisticated design of EFG elevates your environment quickly and easily. With the lowest base profile in the industry and refined details like butt-jointed glass and polished aluminum corners, the design is clean and uncomplicated from top to bottom.

A choice of sliding, pivot, or butt-hinge doors gives you the versatility to meet any space or aesthetic need. And the frameless glass system touches the building lightly, using mechanical fasteners only at the slab to save you time and money every time you install or move a wall.

Clearly Inspired. With EFG, the possibilities for storefront designs are truly unlimited. Create endless runs of frameless glass using straight lines, variable-angle corners, or even organic shapes with faceted curves. Stop and start the glass exactly where you want, integrating with standard Enclose walls or seamlessly transitioning to conventional construction.

TRIVATI

Trivati. An elegant, architectural wall system that can be customized to your heart's content. Its flexible tri-channel rail can be fitted with up to three layers of vertical insert panels letting you fine-tune aesthetics, visual and acoustical privacy, and budget room by room, while creating one cohesive look.

Change Your Mind. Change Your Wall. Want to turn a wall into a window, refresh your look with a new panel material, or simply update your technology? Trivati's versatile infrastructure and non-progressive tiling let you make changes on any scale, from moving an outlet to replacing a single panel or an entire room. This flexible, future-ready design enables you to meet today's needs and evolve to face new challenges tomorrow.

A Sound Choice. Trivati's tri-channel design delivers the best visual and acoustical privacy in the market, earning even higher Sound Transmission Class (STC) ratings than traditional drywall and other demountable walls. Integrated double-glazed door options maintain the integrity of the wall's STC rating, protecting the acoustical privacy so the sound barrier is not compromised.

Globally Inspired. Locally Made. Originally designed for the European market, Trivati has been adapted to make it easier and more convenient for Haworth's North American customers to use. It is manufactured in Holland, Michigan, and glass is sourced locally for each project, making it less expensive and faster to fulfill than European-sourced products.

Any Form. Any Function. A window. A wall. A door. A room. Trivati's unique tri-channel rail can be filled with one, two, or three vertical insert panels to create ideal spaces for any place or purpose. Layer glass, veneer, textiles, metal, integrated lighting, or any material you can imagine to design atmospheres that reflect distinct identities. However you complete the picture, Trivati's light, modern scale and uncomplicated beauty will elevate any environment.

Pinpoint Pricing. The tri-channel rail gives you the flexibility to equip every room individually. There's no need to compromise to meet performance or budget needs. One simple solution lets you invest more where it matters and less where it doesn't.

Future-Ready Framing. As a demountable wall system, Trivati offers a flexible long-term solution for changing environments. Haworth manufactures the floor and ceiling rails that form Trivati's framework, and the walls themselves are site-assembled using insert panels that can be locally sourced. This adaptable design ensures interchangeability and reuse, saving installation time and costs and eliminating unnecessary waste.
